

**MANUEL**

# BIO

In 2013 Manuel Villa met for the first time an electronic instrument, the "synthesizer" which changed the way he understood the analogy of electronic music, a particular synthesizer module caught his attention, the OSCILLATOR which is in charge of generating the waveform created by the electronic sound. Manuel Villa who had been touring the most important festivals in Barranquilla and Buenos Aires; working in the area of music production at SnP Records as PV Soul Motion decides in 2016 to name his new stage act "OSCILLATOR" adding his closest influences of electronic music such as Techno, Groove acid House and Disco. Currently working as sound designer at SnP Records Barranquilla.
